(Libi's mom + dad)

Dr. Barone, Dr. Williams + everyone who helped with Libi, 3/2011

With many thanks
to you + everyone
for your kindness.

I want to thank you for all your help, encouragement + work with Libi. At the time of the first incident + bad news you were always positive, optimistic + honest. We all knew, but didn't know when and you never gave up with her and we appreciate that. I feel we all did what we could (as much as I sometimes feel maybe if ???) did things different I don't think there was any more - she was crying + I think she was telling me + was preparing me when she was staying by herself in other rooms when her whole life she was @ my side. But I am human - + can't be prepared + wanted more time with her.

I am giving you all her medications as we spoke about - hoping it can help another dog(s) - my way of keeping Libi around + maybe another.

I have also enclosed a picture of Libi + I feel if you look at it - she is talking to you -

This is Libi, September 2016
very active + chasing water
bottles (tennis balls too) what
she loved to do. Who would
of thought or even dreamt that
2 months later we'd face ^{»(nightmare)}
what we did with her. It went
so fast - It really taught us all
to enjoy each moment we have - she
did. Thank You for all your help *Cathy*
