

Thank You

Thank you for taking
such good care of
Wesley -- and your
kindness.

Sandy & Marie

10 September 2011

Dear Dr. Puccio
and all of the staff at OMLI who helped treat Duffy in March,

On July 12th, 2011 Dr. Marion Conway put Duffy to sleep.
Thanks to your unparalleled care, he lived 3½ months after his surgery,
and good months they were.

You and Dr. Conway told us there would be subsequent bleeds
down the road, and inevitably, he experienced the last one the night
before we had to put him down. He was fine up until that time,
spending the months prior playing and enjoying his family and
friends. He never showed any signs of discomfort or weakness. Duffy
went downhill on the evening of July 11, and within a matter of twelve
hours, we knew it was time for us to let him go.

We can't thank you enough for the wonderful care Duffy received,
and the kindness with which you treated us - his worried "moms."
We do not for one minute regret Duffy's having the surgery. It gave us
another 3½ months during which to love and enjoy him.

Thank you so much,

Sandy Grierson & Marie Zidzik
