March 2011

We first began working with Giuliana after our 7-year old dachshund, Squeak, underwent his second surgery for intervertebral disk disease (IVDD). Giuliana has been working with Squeak in one-hour weekly sessions for almost a year now, and the progress he has made is unbelievable. She has been instrumental in Squeak's increased energy level, improved motor capacities, and overall health. Giuliana is an extremely good teacher, and often invites members of the family to watch and practice the exercises she uses so that we can do them with Squeak when she isn't around. Her professionalism and innate passion for animals shines through her work, and she is absolutely committed to bringing the best out of Squeak. She challenges him and nurtures his independent personality, while utilizing some of the most up to date techniques and exercises. The bond they have is truly incredible, and she is thoroughly devoted to his success.

We honestly believe that if we had worked with Giuliana after Squeak's first IVDD surgery, he would not have had to endure the second surgery. Due to Giuliana's continued efforts to maximize his motor functioning, Squeak has both the energy level and the physical abilities of a newborn pup.

We highly recommend Giuliana for any animal in need of physical therapy, no matter how severe the situation may seem. Her unique ability to understand the innate language of animals sets her apart from many other professionals in her field.

Sincerely,

The Kutujian Family
